June 15, 2016 — Maple Systems recently announced the launch of two new products in their HMI series, the 7" HMI5070DL, and the 9.7" HMI5097DXL.

Maple Systems Dual-Ethernet HMIs divide industrial control and remote access functionality between two separate Ethernet networks: an internal industrial communications network, and an external wide area network (WAN). This is designed to offer customers a connected IIoT while providing increased security of an internal control network. Two 10/100/1000 Base-T Ethernet ports and up to a 1 GHz processor keep machinery operating at peak performance. Product highlights include:
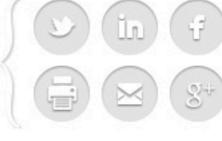

- Bright 16 million color displays
- Analog resistive touchscreens
- Up to 1024 x 768 pixel high-resolution TFT
- Up to 1 GHz processor
- Up to 512 MB Flash memory, 256 MB RAM
- Plastic enclosures
- 2 Ethernet ports, 3 serial ports, 1 USB host port

FEATURED PRODUCTS

New High-Value BRX PLC
AutomationDirect extends Do-more line with BRX PLC; motion control, built-in data logging & more. Prices start at $199.

Downtime is death.
The FLIR AX8 helps you guard against unplanned outages, service interruptions, and equipment failure to avoid downtime.

Sleek & Compact: 10" Panel PC
Maple Systems 10" Panel PC is IIoT-ready and offers a high-res touchscreen, fast CPU, Ethernet & Serial for only $1695.

SmartFlex: Intelligent Routers Made Easy
With flexible hardware configurations, multiple app hosting, customizable Linux scripting and more, get exactly what you need the smart way.
