# Maple Systems Introduces Combo HMI-PLC with Custom Plug-in I/O

by Design World Staff

Wednesday, February 01, 2012

[ShareThis](#)

Maple Systems has introduced a new product called the HMC (Human Machine Controller). The HMC is cost effective, efficient, and compact, combining an HMI and PLC into one unit. Simply put, HMC=HMI+PLC.

With customizable I/O, the HMC accepts up to five plug-in I/O modules with varying configurations of digital and analog inputs and outputs. Choose a 3.5-inch or a 5.7-inch touchscreen display, each equipped with six function keys adjacent to the screen.

One software application is used to program both the graphic interface and the ladder logic resulting in improved performance and efficiency. Besides offering a stand-alone solution, the HMC can integrate with an existing system serially and supports many popular communication protocols.

The HMC's durability and performance are backed up with a Class I Division 2 rating as well as cULus, NEMA 4, CE, and RoHS certifications.
