- Note 3:** Communication cable part numbers contain a prefix that identifies the Maple model, a 4 digit number (-xxxx) for the specific controller model, and a suffix that identifies the cable length in feet (example: 7444-0040-5 is a 5ft. cable for communication between an HMI5043N and a MicroLogix 1000 PLC). For a list of the part numbers for our standard 5-ft communication cables, visit our website at [www.maplesystems.com/cables.htm](http://www.maplesystems.com/cables.htm).
- Note 4:** Cable lengths must be in multiples of 5' (i.e. 5, 10, 15, etc.). To order cables in a length other than 5 feet, replace the 5 at the end of the part number with the length in feet and add \$2.00 to the list price for each foot. (Example 7446-xxxx-10 is list \$55.00 plus \$20.00 [for 10'] for a total of \$75.00)
